SIZE: XS-3XL

FEATURES:

- Preshaped construction
- Silicone print for better grip
- Short gauntlet
- Wrist closure

GLOVES TECHNOLOGIES

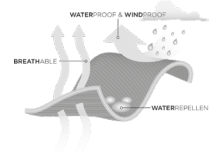

DUROLOFT

DUROloft insulation traps warmth in air pockets, providing great thermal insulation / DUROloft Eco has the same properties as DUROloft but is made of recycled and recyclable fibers / DUROloft Bio is a mix of wool and Polylactic acid fibers, a bioplastic derived from renewable resources. DUROloft combines the great thermoregulating and antibacterial properties of wool with the lightness and quick-dry properties of synthetic fiber. All DUROloft insulations are available in different weights and combined with different fabrics, to cater for all your outdoor activities.

DRYOSPHERE

DRYOsphere fabrics provide a waterproof/breathable barrier from the elements. A shield against water and wind, DRYOsphere fabric also allows for water vapor to escape from the body, keeping you dry and comfortable in any conditions.

CLARINO

The secret to Clarino's™ superior strength and supple hand-feel is the ultra-fine fibre technology. The material is composed of a non-woven fabric consisting of ultra-fine fibres which are impregnated with polyurethane. This helps the fibre to be more flexible and easier to process.

D30®

D30® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.
