## PROTECTION TECHNOLOGIES

### LUMBAR SUPPORT

For improved protection of your back and spine, with extended support in the crucial lumbar area.

D30® is a unique material that focuses on energy dispersion in critical areas for maximum shock absorption and protection. The functionality of the raw material originates from the synergetic effects of the polymer-based dilatant. Energy is distributed throughout the synthetic elastomeric polymer and the enhanced chemistry continues to disperse the energy throughout the matrix, significantly reducing the effect of impact.

### EASILY WASHABLE

Inserted protective plate is easily removable and washable.

Performing at your best requires maximum freedom of movement. While protecting against any energy impact, AirFlex is light and follows your every movement. Soft as a marshmallow, but as hard as a diamond in case of an impact, AirFlex with D30® feels like a second skin that adapts to your body.
